

PalWorld

- [Connecting to your server](#)

Connecting to your server

Using direct connect via the Palworld game.

Currently the game has an issue that results in the password prompt not showing when using the direct connect option, Due to this if your server has a password it will need to be added to the community page. CreeperPanel will take care of this for you however we recommend setting a server name via the settings menu so you can easily find your server.

Using community server listings via the Palworld game.

You can search for your server by using the searchbox in the multiplayer option of the game. Currently there does seem to be an issue with it refreshing so moving to another tab and back then clicking search again will return different results so it could take a few tries for your server to show up.
