

Kick/Ban and unban players

To kick/ban and unban player you will first need to make sure you are an admin and that you have enabled the console on your client. You can find a guide on enabling the console at

[https://www.creeperhost.net/wiki/books/valheim/page/enabling-and-opening-the-](https://www.creeperhost.net/wiki/books/valheim/page/enabling-and-opening-the-console)

[console](#) and a guide on becoming an admin at

<https://www.creeperhost.net/wiki/books/valheim/page/adding-admins>

Some commands require the Steam64ID of the player, you can use the following guide to find their ID

<https://www.creeperhost.net/wiki/books/steam/page/how-to-find-a-players-steamid>

Kicking a player

1. Login to your server and press the F5 key on your keyboard to open the console.
2. Type the command `kick <Steam64ID>` and press enter
You can also use the player name to kick the player `kick <playerName>`
3. You should now get a message that the player has been kicked and they should no longer be connected.

Banning a player

1. Login to your server and press F5 to open the console
2. Type the following command replacing `<Steam64Id>` with the steam id of the player you wish to ban `ban <Steam64Id>`
If the player is currently connected to the server you can use their name `ban <playerName>`
3. Press enter and you should see a message saying the user has been banned.

Unbanning a player

1. Login to your server and press the F5 key to open the console
2. Enter the command `unban <Steam64Id>` and press enter

3. You should now get a message saying the player has been unbanned

Viewing banned players

1. Login to your server and press F5 to open the console

2. Type `banned` into the console and press enter

3. You should now see a list of all the banned players
